## Device Software Management

TOTAL POINTS 3

1. Which of the following is the piece of information that Windows will use to search for the right driver for a new piece of hardware connected to a Windows computer?

1 / 1 point

- ☐ PnP code
- ☒ Hardware ID
- ☐ Drive Identification Number, or DiD

Correct

Nice job! The Hardware ID will be used by the operating system to search for the appropriate driver for the newly connected hardware device.

2. In Linux, in the /dev directory, devices that start with sd can be associated with what type of device? Check all that apply.

1 / 1 point

- ☐ Speakers
- ☒ Hard drives

Correct

Great work! The /dev/sd\* devices are associated with mass storage devices.

- ☒ USB drives

Correct

Great work! The /dev/sd\* devices are associated with mass storage devices.

- ☒ Memory sticks

Correct

Great work! The /dev/sd\* devices are associated with mass storage devices.

3. Which of the following correctly describes a "Security Patch?"

1 / 1 point

- ☒ A piece of software that's meant to fix up a security hole.
- ☐ A piece of fabric that's meant to patch a broken cable.
- ☐ An entirely new, more secure, version of an operating system.

Correct

Awesome! That's the purpose of a security patch!
