Assemble a Computer

LATEST SUBMISSION GRADE

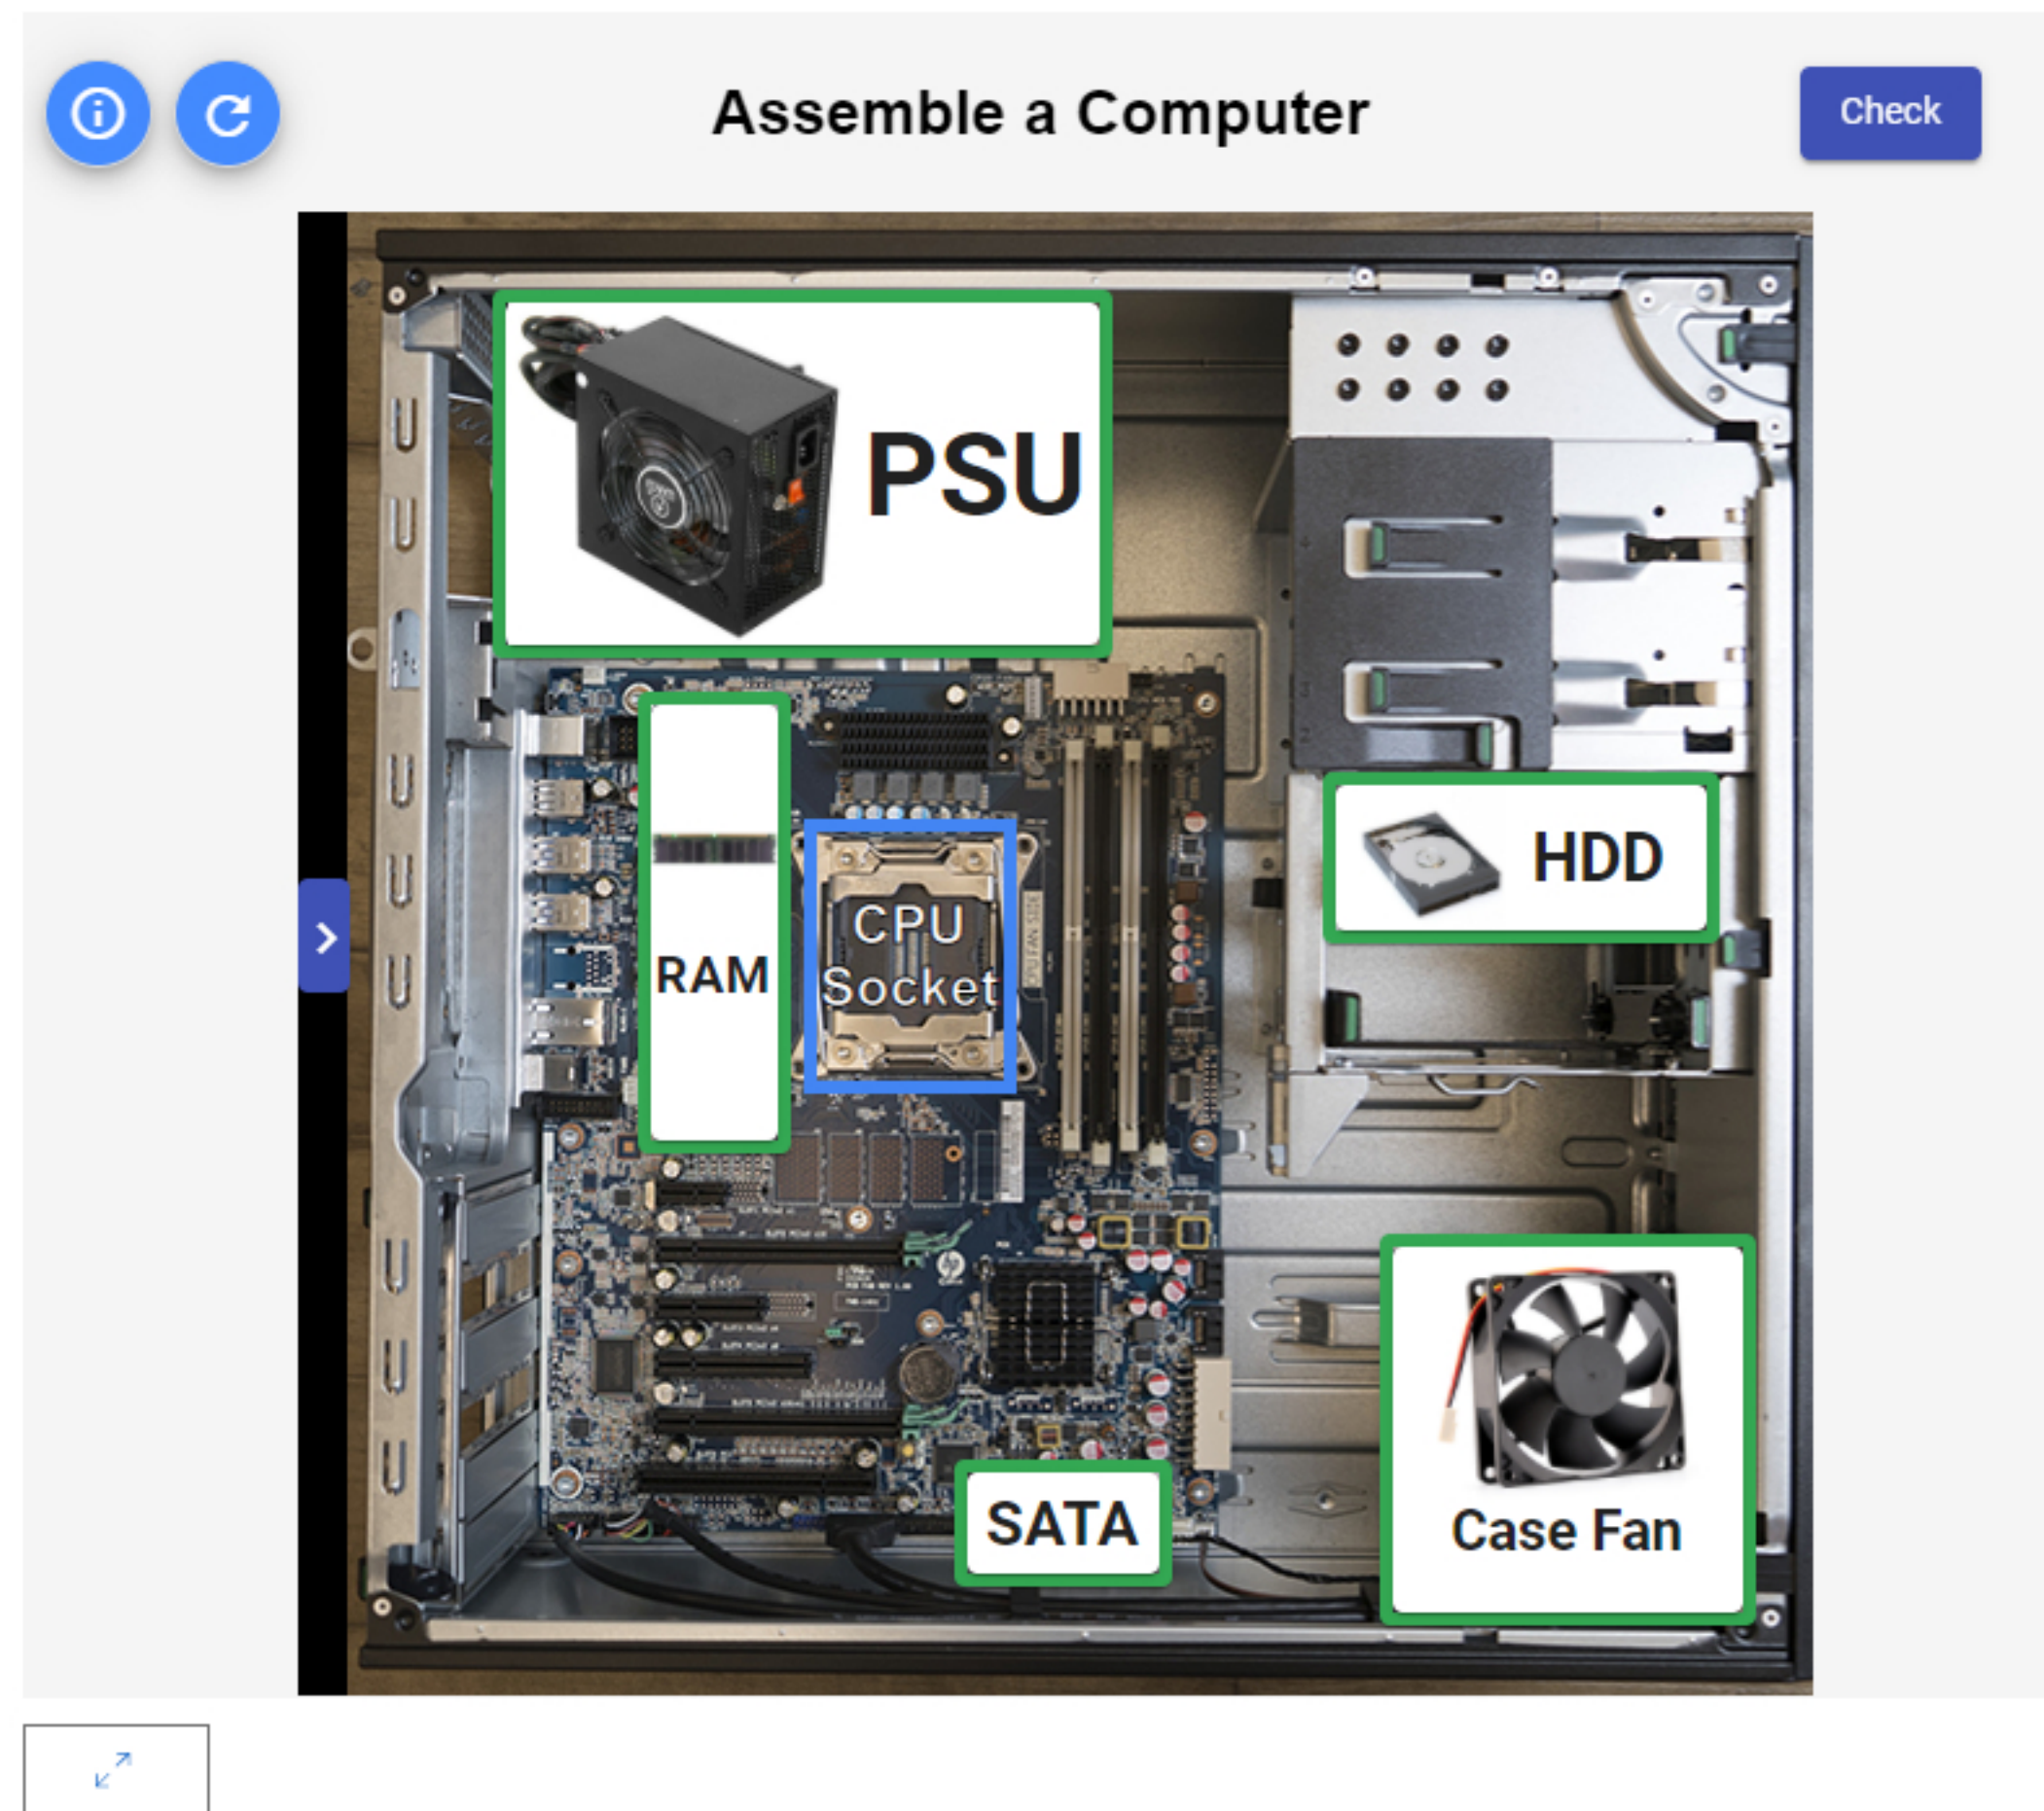

100%

1. You will assemble a computer virtually by drag-and-dropping the components to the corresponding red sections.

1 / 1 point

In the CPU section, you will need to place the items in the correct order from bottom to top. What this means is that you will place the component on the screen in the order that you would put them into the physical computer first.

Click the "Check" button to check your answers. Correct placements will be outlined in green, and incorrect placements will be outlined in red. If you've made a mistake, edit your placements or reset all placements by clicking the button with the arrow and try again. When you're done, click the "Submit" button for a grade.

✓ **Correct**
Congratulations, you are correct!
