TOTAL POINTS 2

1. You're interested in using the services of a vendor company. How would you assess their security capabilities? Check all that apply.

1 / 1 point

- ☐ Assume that they're using industry-standard solutions
- ☒ Ask them to provide any penetration testing or security assessment reports

Correct

Great job! A security assessment questionnaire allows you to quickly and efficiently get a broad understanding of what security measures a vendor company has in place. If available, any reports detailing penetration testing results or security assessments would also be valuable.

- ☐ Request full access to their systems to perform an assessment
- ☒ Ask them to complete a questionnaire

Correct

Great job! A security assessment questionnaire allows you to quickly and efficiently get a broad understanding of what security measures a vendor company has in place. If available, any reports detailing penetration testing results or security assessments would also be valuable.

2. What's the goal of mandatory IT security training for an organization? Check all that apply.

1 / 1 point

- ☒ To build a culture that prioritizes security

Correct

Exactly! IT security training for employees should be designed to educate them on how to keep themselves and the organization secure, and to encourage a culture of security.

- ☐ To avoid the need for a security team
- ☐ To punish employees with poor security practices
- ☒ To educate employees on how to stay secure

Correct

Exactly! IT security training for employees should be designed to educate them on how to keep themselves and the organization secure, and to encourage a culture of security.
