Authorization and Accounting

TOTAL POINTS 3

1. What role does authorization play?

1 / 1 point

- ☒ It determines whether or not an entity has access to a resource.
- ☐ It verifies an entity's identity.
- ☐ It verifies passwords.
- ☐ It provides strong encryption.

Correct

Awesome! Authorization has to do with what resource a user or account is permitted or not permitted to access.

2. What does OAuth provide?

1 / 1 point

- ☐ Confidentiality
- ☐ Integrity
- ☒ Access delegation
- ☐ Secure communications

Correct

Wohoo! OAuth is an open authorization protocol that allows account access to be delegated to third parties, without disclosing account credentials directly.

3. How is auditing related to accounting?

1 / 1 point

- ☐ They're not related.
- ☐ They're the same thing.
- ☐ Accounting is reviewing records, while auditing is recording access and usage.
- ☒ Accounting is recording access and usage, while auditing is reviewing these records.

Correct

That's exactly right! Accounting involves recording resource and network access and usage. Auditing is reviewing these usage records by looking for any anomalies.
