Installing an Operating System

TOTAL POINTS 5

1. True or false: If you have a 32-bit CPU architecture, it's recommended to use a 64-bit operating system.

1 / 1 point

- ☐ TRUE
- ☒ FALSE

Correct

Nice work! To have better compatibility with your OS and CPU, you should be using the same CPU and OS architecture.

2. If you want to boot into a USB drive, how do you change your boot settings?

1 / 1 point

- ☒ Go into the BIOS settings and change the boot settings
- ☐ Replace the CPU.
- ☐ Wipe the computer.
- ☐ Login to the machine.

Correct

Right on! To change any boot settings, you'll need to modify your BIOS settings before the computer loads up the operating system.

3. What is the file manager in macOS called?

1 / 1 point

- ☒ Finder
- ☐ File Explorer
- ☐ Konqueror
- ☐ Midnight Commander

Correct

Great job! The file manager in MacOS is called Finder.

4. What command can you use to create a file using bash?

1 / 1 point

- ☐ cat
- ☐ ls
- ☒ touch
- ☐ mkfile

Correct

You got it! You can use the touch command to create a file using bash.

5. A ____ is an emulation of a physical machine.

1 / 1 point

- ☐ BIOS
- ☒ virtual machine
- ☐ driver
- ☐ kernel

Correct

That's right! A virtual machine is used to emulate a physical machine.
